

# Introducing...

## *The Yukon Dana 44 4.88 Thick Gear for 2003 Jeep Rubicon*

- ◆ utilizes existing lockers
- ◆ made of high-quality 8620 steel
- ◆ suitable for older Dana rear-ends with a 3.73 & down carrier case

The 4.88 thick gear is designed to mesh seamlessly with the 2003 Jeep Rubicon lockers and other 3.73 and down carriers.

In the image above, on the left is the standard 4.10 and up carrier. The right part is a 3.73 and down carrier. The new Yukon 4.88 thick gear makes up the difference in height so the OEM carrier can still be used in the 2003 Jeep Rubicon and older Dana rear-ends.

Difference in height of standard D44 gear and Yukon thick gear.
