FOR RELEASE JUNE 28, 2002

9" Racing Dropout Cases

Do you have 850hp and a stock 9" Ford? Stock 9" cases have a tendency to flex under extreme loading conditions. If it doesn't blow up immediately, your stock 9" is on the fast path to failure. The solution is a 9-Plus Race Case. The new cases are significantly stronger than stock (100% more) and can handle the extreme conditions a big motor and sticky tires can create. To go along with these cases, Randy's Ring & Pinion can tailor make any combination you may require. Also ask about our exclusive "Purple" pinion supports!

The 9" dropout cases are in stock, priced to sell and ready to ship today.
