

Randy's Ring & Pinion now stocks Detroit Lockers for Dana Spicer model 60 (D60) in a 40 spline version as well as the 16, 30, and 35 spline versions. The new 40 spine design works with custom aftermarket axles to provide the very strongest locker and axle combination for the very most serious off-road and drag race applications. These new 40 spline units are "Soft Locker" designs that dampen banging and clucking with the same great mechanisms that the other models use.

The 40 spline design works equally well in front or in rear applications.
