**FOR RELEASE JUNE 28, 2002**

## **Dana 60 King Pin Rebuild Kit**

Randy's Ring & Pinion has put together a complete kit to overhaul your king pins on Dana 60's. Anytime you're building a new front end or just doing a rebuild it's a good idea to replace the parts associated with the knuckle. This kit will fit any Dana 60 front end that is king pin style rather than the newer ball joint style.

This kit will save a lot of hassle from ordering parts from different people and driving around town to track down separates. This kit will include bearings, races, seals, pin, bushing, spring, cap, gaskets, bolts, nuts, lock washers, and even new grease zerker fittings. It is the most thorough kit you'll find anywhere.

In addition Randy's also has replacement u-joints, axles, & ball joints for Dana 60's. Other new products will include front Dana 60's including 4340 Chromemoly 35 spline outer stub axles for Chevy, Ford, as well as Dodge. 4340 Chromemoly blank axle shafts that can be cut to length & splined whatever spline count you may need to fit all the custom applications.
