**FOR RELEASE JUNE 28, 2002**

### **Extra Heavy Duty GM 8.5 Carriers**

Are your carrier journals breaking? Randy's Ring & Pinion has Extra Heavy Duty GM 8.5" Carriers in stock and ready to ship today. These carriers have a 50% thicker bearing journal than the original stock carriers. The larger journal also incorporates a large, smooth radius for even greater strength. And, this 8.5" carrier uses a high tech low angle carrier bearing that is designed to last longer under high radial loading.

In addition, this new heavy-duty carrier fits the new 8.6" designs used in 2000 and newer ½ ton trucks when used with 30 spline 8.5" spider gears.

Don't forget to ask for the XHD bearings to go along with your XHD carrier. Priced to sell, call Randy's Ring & Pinion sales department for more information.
