

Randy's Ring & Pinion now has brand new OEM quality Toyota 8" housings and lot of other new Toyota parts in stock!

These housings are brand new OEM quality and are produced thousands at a time for higher precision and strength with lower production costs. Randy's has priced these low enough to compete with used prices so the customer can have brand new parts for the same price as used without spending time looking for a deal and cleaning old parts. These high quality housing also add peace of mind instead of used parts with an unknown history of abuse.

Randy's has also lowered prices on Toyota pinion yokes, spider gear sets, and carrier cases. These are all OEM quality parts that are made to last. The pinion yokes are drilled with three different patterns to allow for a larger variety of applications. The spider gears are made using the latest "net form" forged technology. All of these parts are in stock and priced to sell.
