FOR RELEASE JUNE 28, 2002

Rearend Set-Up Shims from Randy's Ring & Pinion

Randy's Ring & Pinion has a huge supply of rear end set-up shims in stock for popular and not so popular differentials. Applications include American passenger cars and trucks and Toyota trucks, as well as many import designs.

Have you ever tried to setup a rear end without the right parts? Randy's carries a huge variety of shims for setting: backlash, pinion depth, pinion bearing preload, carrier bearing preload, standard and limited slip spider gear clearance, and clutch preload.

Randy's has these shims in stock as complete shim kits, with or without bearings. Shims and shim packages for many applications are available separately. If you have an odd application, Randy's Ring & Pinion can usually make a custom package for your specific needs.

Editor's Contact: Dianna Lyn, at (800) 291-1360 ext. 5516, or visit our Web site at <http://www.ringpinion.com>.
