

## **New on the Scene: Super Adjustable Carrier Shims at Randy's Ring & Pinion!**

**March 9, 2004: Randy's Ring & Pinion**, a leading supplier of truck and off-road differential parts, is proud to introduce the arrival of Super Adjustable Carrier Shims to its incomparable inventory of differential supply and stock. Once the tool of the rich and overpaid, Super Adjustable Carrier Shims for OEM-design rearends are now available to the masses through Randy's Ring & Pinion at everyday, affordable prices.

The beauty of these shims is in their simplicity. Just drop the number you need in and watch as these shims adapt to any thickness creating the perfect fit for any application. OEM shims are no longer available from GM and, when found, are typically only offered via special order from Ford, at about \$8.00 for each single shim width. On the other hand, one set of Super Adjustable Carrier Shims will cover practically any required thickness for one rearend. And, they are easy to adjust from 0.210" all the way to 0.310"!

Super Adjustable Carrier Shims fit GM 7.5", 8.2", 8.5" 8.6", 8.5" Olds, 12-bolt passenger, and 12-bolt truck. They also fit Ford 7.5" and 8.8", and are a lot easier to work with than factory shims. They are built extra tough to withstand the abuse of hammer installation without cracking, and their stronger design allows for more carrier bearing preload. This feature actually *extends* gear life by holding the carrier bearing preload and supporting the ring gear better over the long haul.

And, just so you know, Randy's also carries Super Adjustable Carrier Shim kits for GM 9.5", Ford 9.75", Ford 10.25", and Ford 10.5" ... as well as shims for hundreds of other differential applications!

### **About Randy's Ring & Pinion**

Randy Lyman started Randy's Ring & Pinion Service in June of 1982. Our Washington State store opened in January 1989 and our Tennessee location in 2001. Since then we have distributed hundreds of thousands of differential parts to thousands of diverse customers. So what puts Randy's Ring & Pinion years ahead of other warehouses and repair shops? Enthusiastic, trained professionals who care about getting your order right the first time, and Randy's technical background and years of industry experience. These things add up to make Randy's Ring & Pinion the only choice for your differential parts and service.
