

## Bearing Puller Press Release

\*\*\*For immediate release\*\*\*

Due to increased overseas competition over the last year, Yukon has re-sourced their US supplier for bearing pullers. They still offer the same high quality tool, with handy bench top stand, at a new suggested retail price of \$296.55. These pullers remove carrier bearings safely and easily, saving them for reuse and they handle applications from import car up to one-ton truck.
