FOR RELEASE JUNE 28, 2002

### **T100 & Tacoma Ring & Pinions from Randy's Ring & Pinion**

Randy's Ring & Pinion now stocks 4.88 & 5.29 ratio ring & pinion sets for the Toyota Tacoma and T100's. The new design differential used in the T100 and Tacoma use a larger gear-set than the earlier pickup designs. These new larger gears fit the standard carrier case and housing without the need for machining. If you or your customers have added taller than stock tires, these ratios will help it drive like stock again and get rid of the bog and clutch slip caused by the oversize tires.
