

Huge inventory of Yukon® Dura Grip™ back in stock

Provides aggressive positraction for more power

*****FOR IMMEDIATE RELEASE*****

EVERETT, WASHINGTON (July 29, 2010) – Randy's Ring & Pinion, the vehicle industry's leader in aftermarket differential parts and service, has a massive inventory of Yukon Dura Grip positractions now available for immediate shipment. New Dura Grip stock includes popular units for the GM 12-bolt passenger car in 30 & 33 spline.

Yukon Dura Grip positractions feature a nodular iron case and internal gear cut from forged 4320 steel for maximum strength. The product's aggressive, four-spring design and composite clutches deliver smooth operation and great traction for street and other racing applications. Every Dura Grip unit is assembled in the USA and is completely rebuildable.

Dura Grip Product features:

- Nodular iron case and internal gears cut from forged 4320 steel
- Aggressive, four-spring design
- Composite clutches for long life
- Completely rebuildable
- Assembled in the USA!

Founded in 1982, Randy's Ring & Pinion offers the largest inventory of more than nearly 6,000 differential parts in the U.S. Same-day shipping is available for customers who place orders before 4 p.m. PT to the company's Washington and California warehouses, and by 2:30 p.m. PT to the company's Tennessee warehouse.
